

Cranford Park

Progression of skills and knowledge for Science

Science Progression of Skills and Knowledge Year R

<p>Year R working Scientifically through knowledge and understanding of the world. Pupils will be taught through discussion to use the following practical and scientific methods and skills.</p> <ul style="list-style-type: none"> • Ask simple questions and recognise they can be answered in different ways. • Use simple equipment to observe closely. • Identify and classify • Use his/her own observations and ideas to suggest answers to questions. • Use scientific language and age appropriate vocabulary. 	<p>Plants</p> <ul style="list-style-type: none"> • Observe that not all trees or plants are the same. Observe not all trees lose their leaves in winter. • Plant seeds to understand what a seed needs to grow: soil, sunlight and water.
	<p>Animals Including Humans All About Me Topic</p> <ul style="list-style-type: none"> • To understand we have bones to hold us up. • Name different parts of the body • Life cycle of a butterfly. • New Life – lambing through the school trip to 4 Kingdoms (or similar eg. Farm) <p>Through the Dinosaur topic</p> <ul style="list-style-type: none"> • Children to learn the terms omnivore, carnivore and herbivore.
	<p>Materials</p> <ul style="list-style-type: none"> • Observe what different objects are made of. • Ice melting into water. • Mud kitchen how water changes the consistency. • Floating and sinking.
	<p>Forces</p> <ul style="list-style-type: none"> • Parachute games and discussion of the air being trapped underneath. • Magnets through investigation and planning in the moment noticing what magnets do and notice not all materials are magnetic.

Science Progression of Skills and Knowledge Year 1

<p>KS1 Working Scientifically</p> <p>Pupils will be taught to use the following practical scientific methods, processes and skills.</p> <ul style="list-style-type: none">• Ask simple questions and recognise that they can be answered in different ways• Use simple equipment to observe closely• Perform simple tests• Identify and classify• Gather and record data and findings to help in answering questions• Use his/her observations and ideas to suggest answers to questions• Use scientific language and age-appropriate vocabulary.	<p>Everyday Materials</p> <ul style="list-style-type: none">• Distinguish between an object and the material from which it is made.• Identify & name a variety of everyday materials, inc wood, plastic, glass, metal, water, and rock• Describe the simple physical properties of a variety of everyday materials. <p>Compare & group together a variety of everyday materials on the basis of their simple physical properties.</p> <ul style="list-style-type: none">•
	<p>Animals, including humans</p> <ul style="list-style-type: none">• Identify and name a variety of common animals inc fish, amphibians, reptiles, birds & mammals.• Identify and name a variety of common animals that are carnivores, herbivores and omnivores• Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets).• Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.• SRE name body parts and the scientific names for outside genitalia
	<p>Plants</p> <ul style="list-style-type: none">• Identify and name a variety of common wild & garden plants, including deciduous and evergreen trees.• Identify and describe the basic structure of a variety of common flowering plants, including trees.
	<p>Seasonal Changes</p> <ul style="list-style-type: none">• Observe changes across the four seasons• Observe and describe weather associated with the seasons and how day length varies• Linked to the Geography topic hot and cold places and habitats.
	<p>Forces</p> <ul style="list-style-type: none">• How things move. Objects move in different ways; they roll, slide, bounce etc• Forces change how things move.• Making forces bigger.• Forces change shapes.

Science Progression of Skills and Knowledge Year 2

KS1 Working Scientifically Pupils will be taught to use the following practical scientific methods, processes and skills. <ul style="list-style-type: none">• Ask simple questions and recognise that they can be answered in different ways including use of scientific language from the national curriculum• Use simple equipment to observe closely including changes over time• Perform simple comparative tests and Identify, group and classify• Use his/her observations and ideas to suggest answers to questions noticing similarities, differences & patterns• Gather and record data to help in answering questions including from secondary sources of information• Use scientific language and age-appropriate vocabulary.	Animals, including humans <ul style="list-style-type: none">• Understand that animals, including humans, have offspring which grow into adults.• Describe the basic needs of animals, including humans, for survival (water, food and air). Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene. <ul style="list-style-type: none">•
	Everyday Materials <ul style="list-style-type: none">• Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses.• Describe how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.
	Living things & their habitat <ul style="list-style-type: none">• Explore and compare the differences between things that are living, dead, and things that have never been alive.• Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other.• Identify and name a variety of plants and animals in their habitats, including micro-habitats• Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.
	Plants <ul style="list-style-type: none">• Observe and describe how seeds and bulbs grow into mature plants. (Plants)• Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy and how they vary from plant to plant• identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers Investigate the way in which water is transported within plants ☞ explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.

Science Progression of Skills and Knowledge Year 3

<p>Working Scientifically</p> <p>Pupils will be taught to use the following practical scientific methods, processes and skills.</p> <ul style="list-style-type: none">• asking relevant questions and using different types of scientific enquiries to answer them• setting up simple practical enquiries, comparative and fair tests• making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers• gathering, recording, classifying and presenting data in a variety of ways to help in answering questions• recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables• reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions• using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions	<p>Animals, including humans</p> <ul style="list-style-type: none">• identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat• identify that humans and some other animals have skeletons and muscles for support, protection and movement.
	<p>Light</p> <ul style="list-style-type: none">• recognise that they need light in order to see things and that dark is the absence of light• notice that light is reflected from surfaces• recognise that light from the sun can be dangerous and that there are ways to protect their eyes• recognise that shadows are formed when the light from a light source is blocked by an opaque object• find patterns in the way that the size of shadows change.•
	<p>Rocks</p> <ul style="list-style-type: none">• compare and group together different kinds of rocks on the basis of their appearance and simple physical properties• describe in simple terms how fossils are formed when things that have lived are trapped within rock• recognise that soils are made from rocks and organic matter.
	<p>Forces and Magnets</p> <ul style="list-style-type: none">• compare how things move on different surfaces• notice that some forces need contact between two objects, but magnetic forces can act at a distance• observe how magnets attract or repel each other and attract some materials and not others• compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials• describe magnets as having two poles• predict whether two magnets will attract or repel each other, depending on which poles are facing.

- | | |
|---|--|
| <ul style="list-style-type: none">• identifying differences, similarities or changes related to simple scientific ideas and processes• using straightforward scientific evidence to answer questions or to support their findings. | |
|---|--|

Science Progression of Skills and Knowledge Year 4

<p>Working Scientifically Pupils will be taught to use the following practical scientific methods, processes and skills.</p> <ul style="list-style-type: none">• asking relevant questions and using different types of scientific enquiries to answer them• setting up simple practical enquiries, comparative and fair tests• making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers• gathering, recording, classifying and presenting data in a variety of ways to help in answering questions• recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables• reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions• using results to draw simple conclusions, make predictions for new values, suggest	<p>Electricity</p> <ul style="list-style-type: none">• identify common appliances that run on electricity• construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers• identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery• recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit• recognise some common conductors and insulators, and associate metals with being good conductors.• observe how magnets attract or repel each other and attract some materials and not others• compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials• describe magnets as having two poles• predict whether two magnets will attract or repel each other, depending on which poles are facing.
	<p>Sound</p> <ul style="list-style-type: none">• identify how sounds are made, associating some of them with something vibrating• recognise that vibrations from sounds travel through a medium to the ear• find patterns between the pitch of a sound and features of the object that produced it• find patterns between the volume of a sound and the strength of the vibrations that produced it <p>recognise that sounds get fainter as the distance from the sound source increases.</p> <ul style="list-style-type: none">•
	<p>States of Matter</p> <ul style="list-style-type: none">• compare and group materials together, according to whether they are solids, liquids or gases• observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)• identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.

improvements and raise further questions

- identifying differences, similarities or changes related to simple scientific ideas and processes
- using straightforward scientific evidence to answer questions or to support their findings.

Animals, including humans

- describe the simple functions of the basic parts of the digestive system in humans
- identify the different types of teeth in humans and their simple functions
- construct and interpret a variety of food chains, identifying producers, predators and prey.

Science Progression of Skills and Knowledge Year 5

<p>Working Scientifically Pupils will be taught to use the following practical scientific methods, processes and skills.</p> <ul style="list-style-type: none">• planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary• taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate• recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs• using test results to make predictions to set up further comparative and fair tests• reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations• identifying scientific evidence that has been used to support or refute ideas or arguments.	<p>Forces</p> <ul style="list-style-type: none">• explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object• identify the effects of air resistance, water resistance and friction, that act between moving surfaces• recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.
	<p>Earth and Space</p> <ul style="list-style-type: none">• describe the movement of the Earth, and other planets, relative to the Sun in the solar system• describe the movement of the Moon relative to the Earth• describe the Sun, Earth and Moon as approximately spherical bodies• use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky. <p>recognise that sounds get fainter as the distance from the sound source increases.</p> <ul style="list-style-type: none">•
	<p>Properties and changes of materials</p> <ul style="list-style-type: none">• compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets• know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution <p>use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating</p> <ul style="list-style-type: none">• give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic• demonstrate that dissolving, mixing and changes of state are reversible changes• explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.•
	<p>Animals, including humans</p> <ul style="list-style-type: none">• describe the changes as humans develop to old age.• Draw a timeline to indicate stages in growth and development• Learn about the changes experienced in puberty.

	<p>Plants</p> <ul style="list-style-type: none">• Describe the life cycle of a plant.• Name the reproductive parts of a plant.
--	--

- Describe the life cycle of a plant.
- Name the reproductive parts of a plant.

Science Progression of Skills and Knowledge Year 6

<p>Working Scientifically</p> <p>Pupils will be taught to use the following practical scientific methods, processes and skills.</p> <ul style="list-style-type: none">• planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary• taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate• recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs• using test results to make predictions to set up further comparative and fair tests• reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations• identifying scientific evidence that has been used to support or refute ideas or arguments.	<p>Light</p> <ul style="list-style-type: none">• recognise that light appears to travel in straight lines• use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye• explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes• use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them. <p>Electricity</p> <ul style="list-style-type: none">• associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit• compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches• use recognised symbols when representing a simple circuit in a diagram. <p>Living things and their habitat</p> <ul style="list-style-type: none">• describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including microorganisms, plants and animals• give reasons for classifying plants and animals based on specific characteristics. <p>Animals, including humans</p> <ul style="list-style-type: none">• identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood• recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function• describe the ways in which nutrients and water are transported within animals, including humans. <p>Evolution and inheritance</p> <ul style="list-style-type: none">• recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago• recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents• identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.
